Company Profile:

Located in Upstate New York since 1968, Trek manufactures high voltage amplifiers, piezo drivers, power supplies, e-chuck supplies, and function generators for demanding applications. The company also makes electrostatic measurement instruments for high performance applications; products include electrostatic voltmeters as well as electrostatic sensors and detectors, charged plate monitors, surface resistance/resistivity meters and ionizers for electrostatic discharge (ESD) applications. Trek products are used in electrophotography, ESD, piezoelectronics, semiconductor equipment and a wide variety of R&D applications.

Trek high voltage amplifiers feature exceptional DC stability and excellent wideband performance enabling generation of precise waveforms to drive capacitive loads, thereby enhancing the precision and performance of multi-million dollar OEM equipment as well as lab-scale research endeavors.

Trek products for electrostatic measurement enable development or enhancement of electrostatic-controlled equipment & systems, or improved management of electrostatic-sensitive processes & environments, resulting in increased quality, productivity or innovation for the user.

Small Business - Trek is a small business as defined by the Small Business Administration.

Affirmative Action - Trek has developed and has on file affirmative action programs required by the rules and regulations of the Secretary of Labor.

RoHS, WEEE, REACH - Trek is in the process of complying with these initiatives but is exempt in some cases. Please go to <http://www.trekinc.com/library/RoHS.asp> for more information.

Facilities & Equipment:

Medina, NY:

Main Office, Sales & Marketing, Accounting
Manufacturing, Shipping/Receiving
30,000 sq. feet facility
High-voltage handling capabilities

Lockport, NY:

Technology Center
Research & Development, Design Engineering
12,000 sq. feet facility
Extensive design and test capabilities

Expertise:

Extensive application knowledge
Experts in electrostatics
Proprietary technology offers innovative solutions
Established track record of long-term relationships
Calibration and repair services
Innovative probes enhance the utility of our electrostatic voltmeters
Custom products represent a significant portion of our business
